ADXBOOKR Plugin

ADDONXPERT

Our ADXBOOKR resource management plugin in the open platform Security Center by Genetec is designed to optimize the use of spaces such as meeting rooms, coworking spaces, etc.

• *Resource Reservation:* Allows users to book meeting rooms directly from a web interface, facilitating the scheduling and organization of meetings.

• *Integrated Calendar:* Features an interactive calendar displaying room availability, allowing users to quickly view available time slots and schedule meetings accordingly. Integration with Microsoft 365 (optional) simplifies meeting scheduling without switching business interfaces.

• *Automatic Notifications:* Sends automatic notifications to users to confirm reservations, providing reminders and details about the reserved rooms, such as their QR code for room access.
Integration with Microsoft 365 (optional) simplifies meeting scheduling without changing the business interface.

• *Permission Management:* Integrates permission management features to define who can reserve which rooms, ensuring efficient resource use and enhanced security.

• *Integration with Security Systems:* Seamlessly connects to Genetec security systems to ensure that access to meeting rooms is secure and compliant with company policies.

• *Customization of Settings:* Offers customization options to tailor the plugin to the organization's specific needs, including the ability to set booking rules (Office Mode), room types (Maximum number of visitors), automatic room assignment, multi-room

Application

Plugin configuration

In Config Tool, the ADXBOOKR plugin allows for the configuration of:
• Connection port settings for the plugin's REST API
• "Super Administrator" account settings to configure access
• Resource settings: Outlook resource, number of participants, office mode, public/private resource, parent/child (multi-resource management), link to instructions (PDF)
• SMTP account settings for sending emails
• Web access link settings for emails

Operational use

Integrating your resources into the ADXBOOKR plugin allows you to leverage the unification offered by the Security Center platform.

Web interface:
• Create users
• Configure time slots with various options: Office Mode, number of participants, non-bookable, recurrence, and guest list (emails)
• List and reservation of available time slots
• Reservation request with a validation process
• Access email to resources (QR code)

Microsoft 365

Our plugin offers seamless integration with Microsoft 365 tools, including:
• Outlook (Desktop, Web, and Mobile): Book and manage rooms directly from your Outlook calendar without leaving your usual work environment.
• Microsoft Teams: Schedule meetings and reserve meeting spaces through the Teams interface, making it easier to coordinate and manage team meetings.
This integration simplifies scheduling and optimizes the use of meeting spaces, while centralizing management tools within the Microsoft platforms you already use daily.

Features

Type of installation	Plugin
Resource Reservation	Room reservations via an intuitive web interface or through Microsoft 365.
Integrated Calendar	Interactive calendar with room availability and optional integration with Microsoft 365.
Automatic Notifications	Automatic confirmations and reminders with details and QR code for access.
Customizing Settings	Adaptation to specific needs with management of reservation rules, room types, validation of requests, number of participants, office mode, etc.
Microsoft 365 integration	Reservation and management of rooms via Outlook (Desktop, Web, Mobile) and Microsoft Teams.
